Re: Application for IT Engineer / Cyber Security Analyst position

Dear Hiring Manager,

I am writing to express my interest in the graduate trainee position at your reputable organization. With a solid foundation in **Cybersecurity** and **IT Engineering**, I am eager to apply my technical skills, practical experience, and passion for technology in a dynamic and forward-thinking environment like Company.

I hold two distinct IT qualifications:

- A **Cybersecurity Bootcamp Certificate**, where I completed a **6-month intensive program** focused on **Python for defensive programming, web development, penetration testing, ethical hacking**, and **digital forensics**.
- A certification in **IT Engineering**, covering **CompTIA A+, Network+, Server+, Security+**, and **Cisco CCNA**, equipping me with strong knowledge in networking, hardware/software troubleshooting, server administration, and IT security.

Throughout the bootcamp, I gained hands-on experience by working on real-world simulations and cybersecurity applications, sharpening both my technical and problem-solving skills. My practical exposure during this time allowed me to work on security tools, automate tasks using Python, and analyze vulnerabilities in controlled environments.

Additionally, I have built a growing **GitHub portfolio** showcasing some of the projects and tools I've worked on during and after the bootcamp:

GitHub Portfolio | HyperionDev Portfolio

Portfolio website : **Personal Portfolio Website**

In my current role as a **Cash Device Monitoring and Troubleshooting Agent**, I:

- Monitor and troubleshoot ATM and coin device issues.

- Analyze faults, log incidents, and collaborate with support teams to ensure timely resolutions.

- Apply technical knowledge to maintain uptime and service quality.

This combination of **formal IT training**, **practical cybersecurity experience**, and **real-world support work** makes me confident in my ability to contribute effectively to your technology team — even in a trainee capacity. I am highly motivated to continue learning and growing, especially in the areas of data, cybersecurity, and systems support.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and dedication to IT innovation align with your Company mission.

Warm regards,
Sandiso Mayekiso
